COMPLETE EQUIPMENT LIFE CYCLE MANAGEMENT

Inspections & Preventative Maintenance

- Keep your lifting equipment working longer & safer!
- Compliance Inspections: Our inspection services will help you comply with your local statutory inspection requirements and support your own maintenance actions.
- Maintenance Inspections: The best way to avoid unplanned downtime and reduce your operating costs is to perform proactive crane maintenance. A scheduled preventative maintenance program is an investment that pays dividends in reduced breakdowns and extended equipment life.

We will:

- Prepare comprehensive inspection reports
- Provide recommendations for repairs or maintenance of your equipment.
- Set up and maintain inspection and certificate records through CertTracker®

CertTracker®

Our FREE online inspection management system, CertTracker®, gives you access at any time, from any computer to easily let you:

- Track your current and past inspection certificates, at any time, from any computer.
- See all your assets in one place
- Search and view detailed equipment information
- Maintain inspection and certificate records
- Export data for reporting
- Print your signed inspection certificates.

CertTracker® will give advanced notice of inspections coming due with email notifications that can be delivered months in advance – never miss an inspection due date again.
